

The market closed strong again last night in Goldfield and every Tonopah stock held its own. There was a lively scene on the Goldfield exchange last night and prices took another jump. Combination Fraction and Booth were easily the leaders. Fraction arose to \$1.78 bid while Booth was .36 bid and no offering. It is predicted that before the week ends that Booth will reach .50 if not better.

More ore is being shipped out of Rawhide at the present time than at any period in the history of the camp. Wednesday two tons arrived in town from the Jordan lease of the Queen Mascot. Thirty tons are on the road between this city and Rawhide from the Grutt Hill Mint. Bert Sales has the contract for hauling it. The Western Ore Purchasing company of Hazen is sampling 300 sacks of high grade just received from the Czar lease on the Regent Mining company's property, and there are 200 sacks more on the dump at the Czar ready for sacking and shipment. The McKinley lease on the same property has just shipped 115 sacks. The I. H. Kent company is handling this ore for the various companies.—Churchill Standard.

NEW YORK, July 27—After Martin Browle, arrested for betting at Brighton Beach track, refused to leave Adams street police court today to answer a grand jury subpoena, acting District Attorney Elder marched into the police court with three county detectives and two police lieutenants and seized Bowle.

Lawyer Jacob Elliprin, Browle's counsel, grabbed at Browle to prevent his being taken away. Browle's father yelled to his son to obey the officers. The courtroom spectators, many of whom were racetrack sympathizers, closed in on the struggling men and a wild scrimmage seemed imminent when Magistrate Tigher succeeded in restoring order. He then adjourned Browle's examination and Elder and his men logged the recalcitrant Browle off to the grand jury room.

We still have a few pairs of Fowne's 16-button silk gloves, the best made. Former price \$2, closing out at \$1.50. Colors: blue, brown, black and white. 7-25-48.

Certification of location for sale at
the Honanza office.

The Grutt Hill Mint, whose principal asset is a lease on the Coalition on Grutt Hill, has been in the limelight all this week, and will doubtless continue to occupy one of the most prominent positions in the mining of Rawhide and in the mining of Nevada.

The Grutt Hill Mint, at the stage of development which has been reached, has not its equal any place in the world. In no mine yet discovered has there been found ore which is as rich as that being taken out of the Grutt Hill Mint. They have sunk to the 150-foot level, and for forty feet in the shaft they have followed a stringer of gold-bearing rock, the only approach to which was seen in the Kearns No. 2 in the drift at the 65-foot level. But this streak of gold which in some places was half an inch in width, has continued for forty feet downward, and has only been stopped by the discontinuance of sinking. At the 150-foot level they have begun drifting both ways, and in both drifts the ore is richer than ever.

In the bottom of the shaft, where the ledge is five feet in width, without either wall having been found, one night this week, the leasers took out from a 3-inch stringer which went not less than \$150 to the pound. In this rock the seam of gold was half an inch in width and there was, besides another stringer, about an eighth of an inch in width, which was nearly as rich. The Mint will make a shipment of twenty tons there ill be, besides, 10 sacks which of rock tomorrow which will average in the neighborhood of \$300 a ton. will average \$10 a pound.

Last night in the north drift, which had been cut into for a distance of ten feet, some more of that beautiful rock was taken out, and it was as rich if not richer, than anything which had been found in the shaft.

Another shipment went out today which contained ore going into the four figures. This was the first shipment from the Jordan lease of the Queen Mascot Mining company. Two tons of this will go in the neighborhood of \$4000 a ton and the balance, about seven tons in all, assays better than \$300 a ton.

There is still another strike in the camp which has created considerable of a stir. This is on the McKinley lease in the Regent district. They encountered a vein at a depth of

twenty-six feet, where the vein is eight feet in width. The screenings go over \$300 to the ton. In this the silver values predominate. Adjoining the McKinley ground is the Edwards and Barlow lease, whence a shipment was sent out last week, the ore averaging over \$100. This lease has the extension of the McKinley vein, and has also the continuation of the Czar lead, so named from the discoveries on the Czar lease of the Wagner and Putnam boys. All three leases are on the Czar claim.

From the Wagner and Putnam lease there went forward this week a shipment of the same values as that from the Edwards and Barlow lease.

The Murray lease of the Rawhide Consolidated, which made the big strike on the 200 level last week, has started a crosscut to the original ledge, in which they are drifting at the 100 level, and where the vein is perfectly defined.

The Kearns No. 2 this week reached the 400 level, the deepest level in the camp. They have already begun to crosscut for the big dyke on which they are now drifting at the 200 level, in milling ore.

The 40-ton mill of J. N. Watt and associates which arrived here last week is now being installed at Cypress Wells, and the owners say it will be in operation in ten days, or not less than two weeks. Swift-water Bill Gates has returned from the coast, and say that part of the increased plant for his mill is on the way from San Francisco. This will increase the capacity of his mill to sixty tons a day, and work to get this into shape is going to be rushed as fast as possible.

Rawhide will have running water in the town in about a week's time, for the pipes have nearly all been laid. Then will follow the 200-ton mill of the Rawhide Water and Reduction company, and when that is in operation with the others, perhaps things won't be humming in Rawhide.—Reno Journal.

LONDON, July 25.—President of the Board of Trade Churchill announced in the house of commons to-day that he was appointing a committee to investigate in "what manner and how far the general supply, the distribution and the prices of meat in the United Kingdom are controlled and affected by any combination of firms or companies.
